What worked well?	<p>Team member Sten:</p> <ul style="list-style-type: none">• I think we were very transparent with one-another <p>Team member Mihhail:</p> <ul style="list-style-type: none">• Communication is good- the extra pressure of deadlines is also a good motivator 😊 <p>Team member Valeri:</p> <ul style="list-style-type: none">• The team members were open with one-another and it was easy to work with everyone. Everyone was aware what their task was. <p>Team member Richard:</p> <ul style="list-style-type: none">• The team was willing to cover each other if someone ran into issues
What could be improved?	<p>Team member Sten:</p> <ul style="list-style-type: none">• Communication broke down at times since at times there were no notifications if someone was not able to attend a meeting. <p>Team member Mihhail:</p> <ul style="list-style-type: none">• Everyone should contribute more so the workload would not be uneven. <p>Team member Valeri:</p> <ul style="list-style-type: none">• We need to participate more in the meetings and be more transparent if we're stuck with our task. <p>Team member Richard:</p> <ul style="list-style-type: none">• could improve our technicalities and participation collectively.

Time management is something to focus on.

Other notes:

- Do not burn out otherwise you won't become QA engineer
- We feel like CerebrumHub mentor answers are a bit late or delayed which kind of creates confusion how the task should actually be submitted. Mainly talking about the forum and live mentorships where the mentor would get back to us after the workshop which can take up to a week 😞
